

SIR40S

Double Power™ Circuitry

High Power Self Contained Siren and Strobe Light

The SIR40 sirens are supplied with or without integrated strobe and are designed with foam resistant grid to comply with most European, UL and other standards.

Ideal for alarm systems warning device, Emergency and Panic posts

- The SIR40S is an outdoor IP-52 Electronic Siren and Strobe Light, with charger and control for 12V 5 or 7A/H SLA rechargeable back-up battery
- Size: 200x160x160 mm, Anodized metal enclosure
- Three tunes electronic siren sound
- Very loud sound level; at over 119 db, or 104 db for SPK model
- Siren, strobe and battery are controlled by a built in processing circuitry. Activated when power cut or -V trig
- Contains a dual activated tamper switch
- The tamper detects cover opening, and also enclosure removal from wall
- Ordering: SIR40S, SIR40SPK (lower sound level)

Back-up battery

- 1 Over 119 db
- 2 Xenon Strobe
- 3 Battery Back up
- 4 Very High Power
